Overview

Update the Weather Display screen to show the current weather description (sunny, raining, etc) as well as the temperature.

Technical Details

The weather description is already available from the OpenWeatherMap API, highlighted in the Json response below:

```
{
  "main": {
    "feels_like": 284.67,
    "humidity": 93,
    "temp_max": 287.74,
    "temp_min": 283.57,
    "pressure": 1006,
    "temp": 285
  },
  "coord": {
    "lat": 51.45,
    "lon": -2.6
  },
  "weather": [
    {
      "description": "light rain",
      "icon": "10d",
      "main": "Rain",
      "id": 500
    }
  ],
  "wind": {
    "lon": 0,
    "speed": 3.13
  }
}
```

UI Design

The design from the UI team for the updated Weather Display screen:
